

VJ-426UF/VJ-626UF/VJ-1626UH - Cleaning of LED Unit	
Cleaning Procedure (*Please wear the rubber gloves.)	
1. Disconnect LED lamp cable.	
2. Remove LED lamp. -Phillips screw x 2 -Hex screw x 1	
3. Cleaning of LED fan Remove the large dust with tweezers first, and clean the fan with cleaning stick dampened with alcohol. Attention: Do not drop the dust inside LED fan.	
4. Cleaning of fin Remove the dust with tweezers. Note: Recommend to use the scraper for removing the fine dust and mist. Attention: Do not use a thick tweezers as it may bend the fin. Please clean gently so that the dust does not get inside.	
5. Cleaning of LED lamp Scrape off the ink deposits with scraper. Attention: If applying too much pressure or using the corner of scraper, it may damage the lamp.	
6. Wipe the entire surface of LED lamp with the waste cloth dampened with alcohol.	No picture
7. Install LED lamp to the original position. -Phillips screw x 2 -Hex screw x 1	
8. Connect LED lamp cable.
